

# CMC BUBBLE WRAPPER

TECHNICAL SPECIFICATION

SPEED: 2500 bags/hour

MINIMUM BAG SIZE:	250x200x5mm
MAXIMUM BAG SIZE:	650x500x150mm

## PC ADD CONTROLLER

PC CONTROL is the “brain” of the machine and it manages all the “in telligent” functions and operations of the machine.

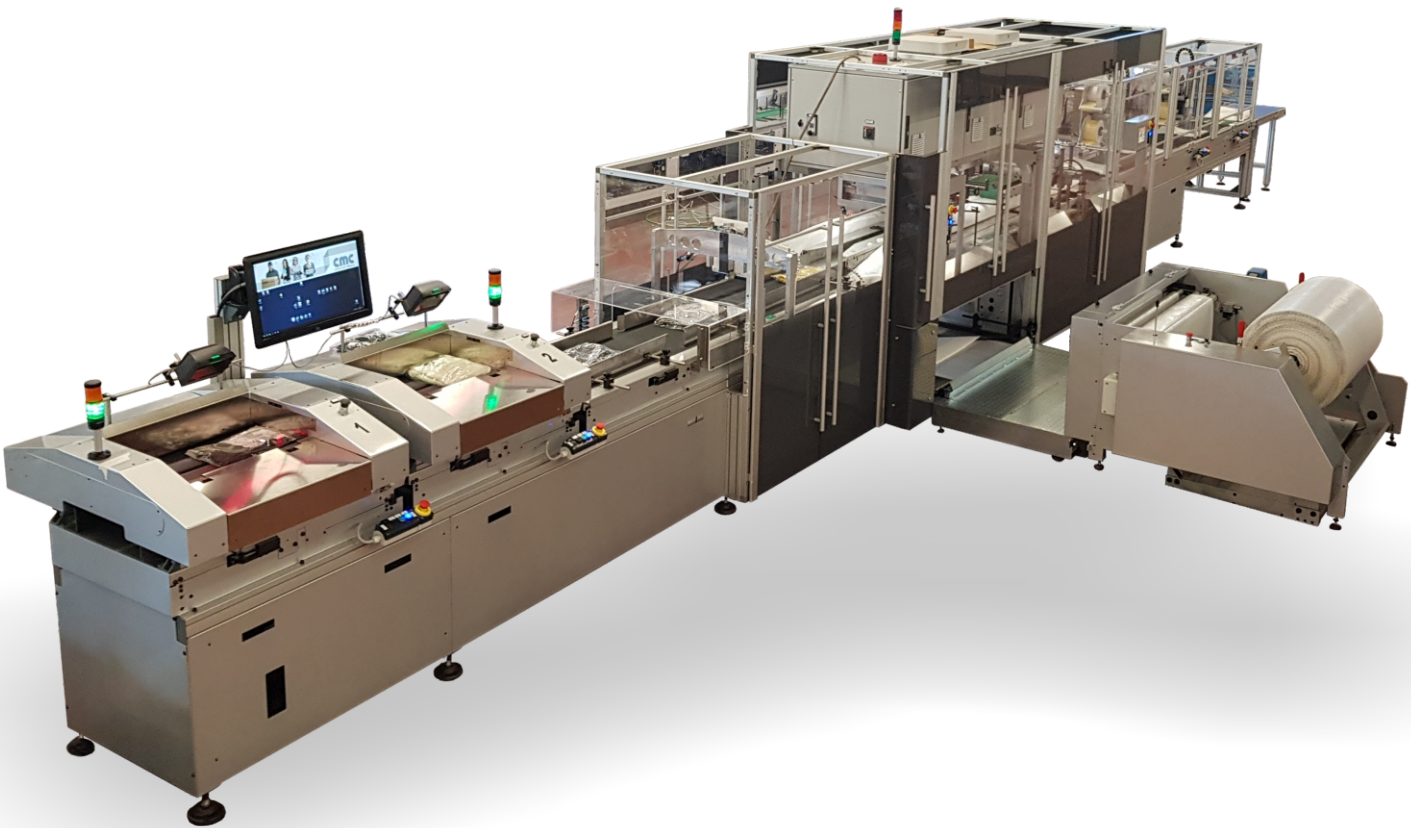

PC CONTROL can work according to various criteria based on each customer needs and it can be personalized accordingly case by case.

- The following key operations are performed:
- Data exchange among the various sections and devices of the machine;
  - Product tracking;
  - Statistics and production report;
  - Log files;
  - Production flow control;
  - WMS communication

**BENEFITS:**  
CMC developed communication protocol allows to integrate ANY CMC packaging machine and to communicate with customer's WMS. CMC Protocol guaran tees data integrity and offer complete reporting and production statistics.
